

AFRICA CONSUMER FUND

September 2013

IN ASSOCIATION WITH THE  Sanlam GROUP

Fund Overview

The Africa Consumer Fund is a long-only, 15-stock equity portfolio diversified across African countries. The aim of the fund is to provide long-term investors with active equity exposure to African Consumer-dominant companies within a sustainable investment framework at relatively low cost.

Investment Process

The fund employs a rules-based investment process led by bottom-up research and detailed company due diligence. Stock selection is driven by company-level fundamental financial factors (revenues, operating cash flows, cash dividends and shareholders' equity) and Sustainable Capital's country and company sustainability assessments. The financial factors introduce a strong value bias into the portfolio construction process. The sustainability ratings act as a quality filter by aggressively up-weighting the highest quality companies and countries in Africa (and vice versa).

The fund's objective is to provide superior risk-adjusted returns in African consumer listed equities over long-term time horizons. The fund is actively managed (benchmark agnostic) with an emphasis on downside risk management. Buy-sell discipline is executed through regular portfolio rebalancing, in keeping with the fund's focus on cost efficiency. Liquidity risk is limited by applying an exposure limits filter.

Fund Manager

Sustainable Capital is an independent, owner-managed, responsible investment asset manager that specialises in the research and management of listed African equity securities, with total assets under management of USD 67.3m.
