

NIGERIA FUND

February 2014

IN ASSOCIATION WITH THE  Sanlam GROUP

Fund Overview

The Nigeria Fund is a long-only, 15-stock equity portfolio diversified across sectors. The aim of the fund is to provide long-term investors with active equity exposure to Nigeria-dominant companies within a sustainable investment framework at relatively low cost.

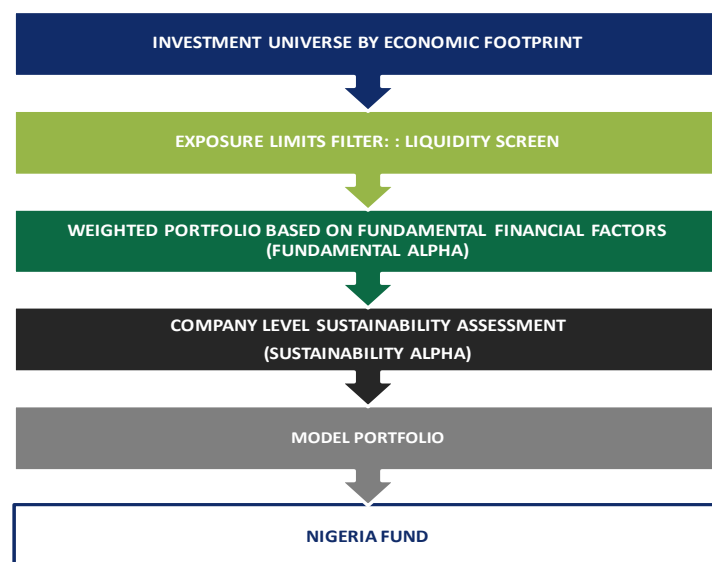

Investment Process

The fund employs a rules-based investment process led by bottom-up research and detailed company due diligence. Stock selection is driven by company-level fundamental financial factors (revenues, operating cash flows, cash dividends and shareholders' equity) and Sustainable Capital's company sustainability assessments. The financial factors introduce a strong value bias into the portfolio construction process. The sustainability ratings act as a quality filter by aggressively up-weighting the highest quality companies (and vice versa).

The fund's objective is to provide superior risk-adjusted returns in Nigeria listed equities over long-term time horizons. The fund is actively managed (benchmark agnostic) with an emphasis on downside risk management. Buy-sell discipline is executed through regular portfolio rebalancing, in keeping with the fund's focus on cost efficiency. Liquidity risk is limited by applying an exposure limits filter.

Fund Manager

Sustainable Capital is an independent, owner-managed, responsible investment asset manager that specialises in the research and management of listed African equity securities, with total assets under management of USD 75.8m
