

# NIGERIA FUND

July 2014

IN ASSOCIATION WITH THE  Sanlam GROUP

## Fund Overview

The Nigeria Fund is a long-only, 15-stock equity portfolio diversified across sectors. The aim of the fund is to provide long-term investors with active equity exposure to Nigeria-dominant companies within a sustainable investment framework at relatively low cost.

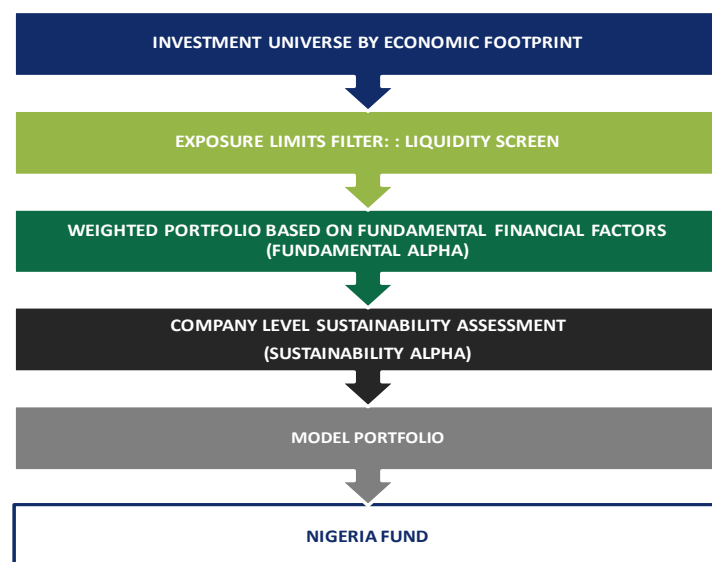

## Investment Process

The fund employs a rules-based investment process led by bottom-up research and detailed company due diligence. Stock selection is driven by company-level fundamental financial factors (revenues, operating cash flows, cash dividends and shareholders' equity) and Sustainable Capital's company sustainability assessments. The financial factors introduce a strong value bias into the portfolio construction process. The sustainability ratings act as a quality filter by aggressively up-weighting the highest quality companies (and vice versa).

The fund's objective is to provide superior risk-adjusted returns in Nigeria listed equities over long-term time horizons. The fund is actively managed (benchmark agnostic) with an emphasis on downside risk management. Buy-sell discipline is executed through regular portfolio rebalancing, in keeping with the fund's focus on cost efficiency. Liquidity risk is limited by applying an exposure limits filter.

## Fund Manager

Sustainable Capital is an independent, owner-managed, responsible investment asset manager that specialises in the research and management of listed African equity securities, with total assets under management of USD 118.5m.
