

Fund Description

The Africa Consumer Fund invests in the top-15 sustainable listed consumer-related companies in Africa (ex-South Africa). The fund aims to provide investors with active equity exposure to the growing consumer African markets within a sustainable investment framework at relatively low cost. Stock selection is informed by detailed in-situ company due diligence with an emphasis on financial quality, robust corporate governance, and environmental and social operating environments.

The information contained herein does not constitute an offer to sell or the solicitation of an offer to purchase the Sustainable Capital Africa Consumer Fund (the "Fund"). Any such offer or solicitation may only be made by means of delivery of an approved confidential offering memorandum that contains material information not present herein and which supersedes this information in its entirety. Any offer or solicitation pursuant to such memorandum shall only be in those jurisdictions where permitted by law. The shares in the Fund have not been registered under the U.S. Securities Act of 1933, as amended ("the 1933 Act"). Accordingly, the offer and sale of any of the shares of the Fund is not permitted in the United States except pursuant to an exemption from registration under the 1933 Act and other applicable U.S. federal and state securities laws, rules and regulations. Any decision to invest in the Fund or any other strategy managed by Sustainable Capital should be made after reviewing such definitive offering memorandum, conducting such investigations as the investor deems necessary and consulting the investor's own investment, legal, accounting and tax advisors in order to make an independent determination of the suitability and consequences of an investment. **Material change in the valuation of Zimbabwean assets: Due to the liquidity constraints facing the Zimbabwean foreign exchange market and the subsequent demand for real assets, including listed equities, we have witnessed strong equity price movements in that market which we believe are not related to company fundamentals. The MSCI Zimbabwe Index generated a total return of +86.69% in September and year-to-date 240%. As a result, the Board has decided to adopt a more relevant methodology which takes account of an implied currency devaluation. For reference, we are using the Old Mutual's share price, a listed security which trades both on the Johannesburg Stock Exchange and the Zimbabwe Stock Exchange. The discount in USD between the two share prices at different valuation points, is a proxy of the level at which investors are currently discounting the Zimbabwean currency. This discount is applied to the Delta share price in the valuation.**
